REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of the record discloses or suggests that a system for detecting signals, comprising: a receiver system configured to receive at least the first received signal and the second received signal and generate at least a first output signal, a second output signal, a third output signal, and a fourth output signal; a correlation system configured to receive at least the third output signal and the fourth output signal and generate at least a correlation signal; a processing system configured to receive at least the correlation signal, the first output signal and the second output signal and estimate a cross correlated power level; wherein the first output signal is associated with at least amplitude information of the first received signal; the second output signal is associated with at least amplitude information of the second received signal; the third output signal is associated with at least phase information of the first received signal; the fourth output signal is associated with at least phase information of the second received signal as recited in claim 1; and a receiver system further configured a receiver system configured to receive at least the first input signal and the second input signal and generate at least a first log-video signal, and a second log-video signal, a first intermediate frequency signal, and a second intermediate frequency signal; a correlation system configured to receive at least the first intermediate frequency signal and the second intermediate frequency signal and generate at least a correlation signal;

Art Unit: 2611

a processing system configured to receive at least the correlation signal, the first log-video signal and the second log-video signal and estimate a cross correlated power level based on at least information associated with the correlation signal, the first log-video signal and the second log-video signal as recited in claims 12, 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Paschen et al (US 2002/0135513 A1) disclose a distribute adaptive combining system for multiple aperture antennas including phased arrays.

Yun (U.S. Pat. 6,463,295) discloses a power control with signal quality estimation for smart antenna communications.

Spencer et al (US 2005/0191978 A1) disclose antenna diversity receiver.

Yun (U.S. Pat. 7,035,661) discloses a power control with signal quality estimation for smart antenna communication systems.
